

Steffan Soule's Coin Magic

Make a coin disappear! Show your family and friends how it pays to recycle, and it costs money if we don't recycle.

Place a coin on a piece of paper. Fold the paper into a square and give it to your friend to unfold. The coin has disappeared!

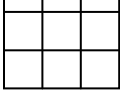

If we don't recycle our resources disappear. If we do, they reappear (make the coin reappear from your friend's ear!)

What you'll need:

1 - 8 1/2" x 11" piece of paper

1 Coin

Pencil or Pen

1. Fold the piece of paper into nine equal parts, like this: 
2. Write an "R" for RECYCLE in the center square.
3. Show the audience that you place a coin in the center square.
4. As you fold the paper with the coin inside let the coin slip out into your lap. Do this while you talk about how not recycling costs money and more than that we lose precious resources from the earth.
5. Give the paper to your friend to unfold. The coin has disappeared!
6. Reach to your friend's ear with the coin hidden in your hand and make it magically reappear! Remind your friend how recycling saves our resources.
